Many inquiries have been received concerning the new requirement, agriculture. Please observe the following:

An applicant for a renewal will not have to pass in the subject of agriculture.

A person holding a second or third grade certificate and applying for a certificate of a higher grade must pass in the additional subjects required in section 10940 and in the subject of agriculture.

An applicant for a first grade certificate will still have three sciences from which to make an election—physics, physical geography and elementary biology. Heretofore the last science named has always been designated "elementary biology relating to agriculture." In the future the questions will be of a somewhat different nature, more biological and less agricultural.

Very truly yours,
C. C. CARLSTEAD,
County Superintendent Public Schools.
